- Windows Version -

## Index

- Step-00 – Before we start;
- Step-01 – Setup WI-FI Connection;
- Step-02 – Jailbreak and RW Access;
- Step-03 – Install SSH – BSB – Installer.app
- Step-04 – Patch the Spring Board
- Step-05 – Activation;
- Step-06 – Install SimFree Application
- Step-07 – Unlock

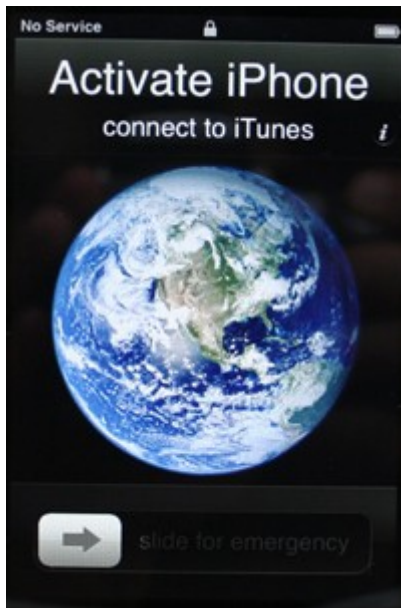

## Step 00 – Before we start

Make sure you have iTunes version 7.4.x installed

Make sure your iPhone is connected to the USB on your computer

If you phone is not activated all you see this is “Pic-01”.

Slide the bar to make an emergency call; Now dial \*3001#12345#\*; (“Pic-02”) and press call.

Pic-01

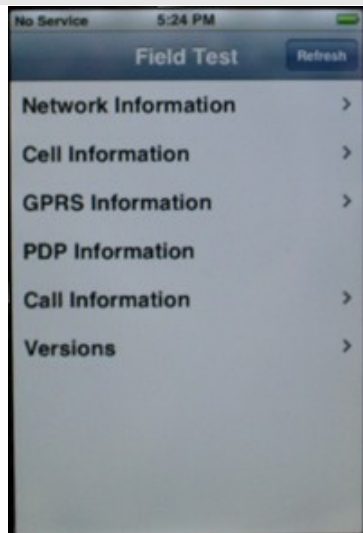

Pic-02

Then tap on version “Pic-03”.

If you see Modem Firmware: 04.01.13\_G, then you have 1.1.1 (“Pic-04”) and you can proceed to **Step 01**,

If your firmware is not 04.01.13\_G, then open iTunes and update to version 1.1.1 and then proceed to **Step 01**

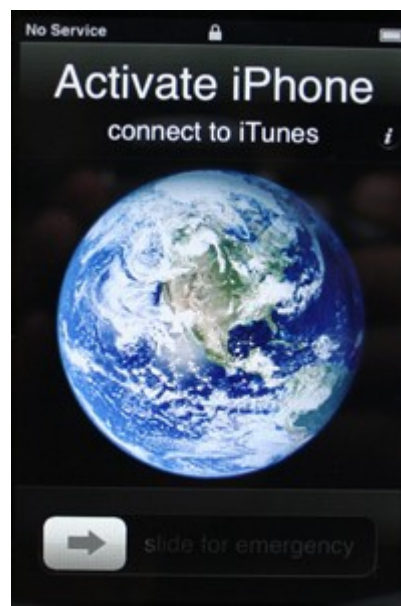

Pic-03

Pic-04

### Step 01 – Setup WI-FI Connection

If your phone is not activated all you see this is "Pic-01".

Pic-01

Slide the bar to make an emergency call; Now dial `*#307#` ("Pic-05") and press call. Your iPhone should now start ringing, now delete the `*#307#` by pressing the X, and then type 0, then press call ("Pic-06")

Pic-05

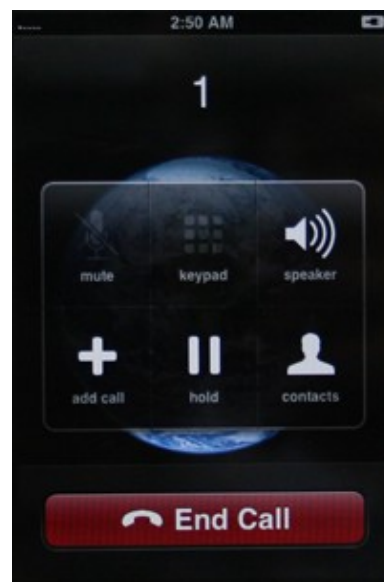

Pic-06

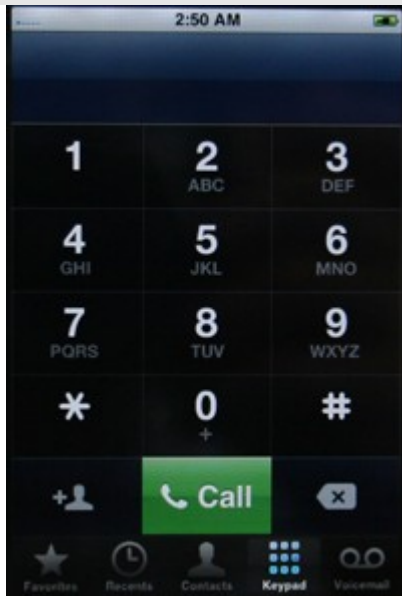

Your iPhone should now start ringing again (“Pic-07”), now you press Answer, then you will press hold (“Pic-08”) it will start ringing again (“Pic-08”), this time you press Decline and it should take you to the main phone keypad (“Pic-09”)

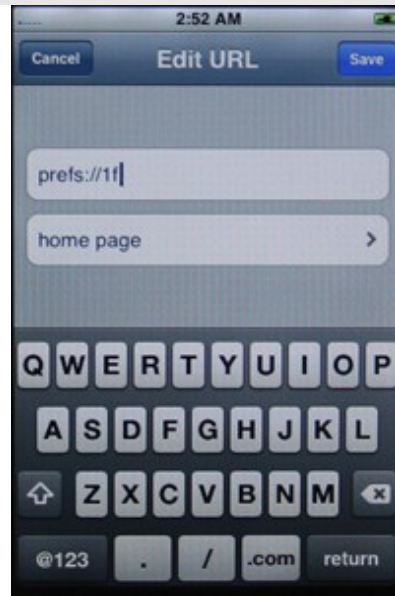

Pic-07

Pic-08

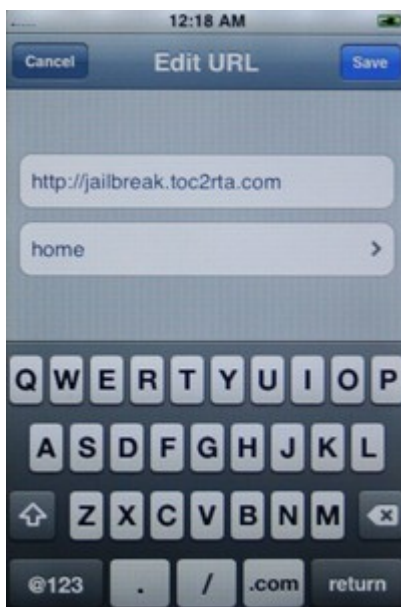

Pic-09

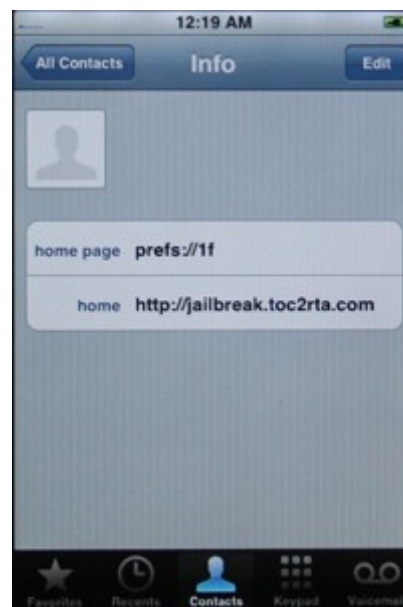

Pic-10

Now at the screen ("Pic-09"), press contact and it will show the contacts press on the + to add a contact, now press Add new URL, and write **prefs://1f** ("Pic-10") and press save

Now press Add new URL again, and write <http://jailbreak.toc2rta.com> ("Pic-11") and press save, then press save again, your screen should now be like this ("Pic-12")

Pic-11

Pic-12

Now press on the link <prefs://1f> and it will take you to the settings of the iPhone ("Pic-13") from there press WIFI and then connect to your WIFI, after it connects to your WIFI, press on the > and write down the IP address of your iPhone, we will use it in a few minutes, after that press the HOME button.

Pic-13

## Step 02 – Jailbreak and RW Access

Now you should be back at the activation screen, slide the bar again, this time only press 0 then call, your iPhone will start ringing, press Answer, then press Hold, it will ring again, now press Decline, and you should see the contacts, open your contact and now press on the <http://jailbreak.toc2rta.com> link it should open your safari, and after a few seconds safari will close and you will be back at the activation screen.

Download iDemocracy v1.3 <http://www.iphone4all.net/iDemocracy-v1.3.zip> , or go to our download sections on our website, unzip it to your desktop.

Now go to iDemocracy v1.3 folder and run the program iDemocracy v1.3.exe, it should now look like this (*"Pic-14"*)

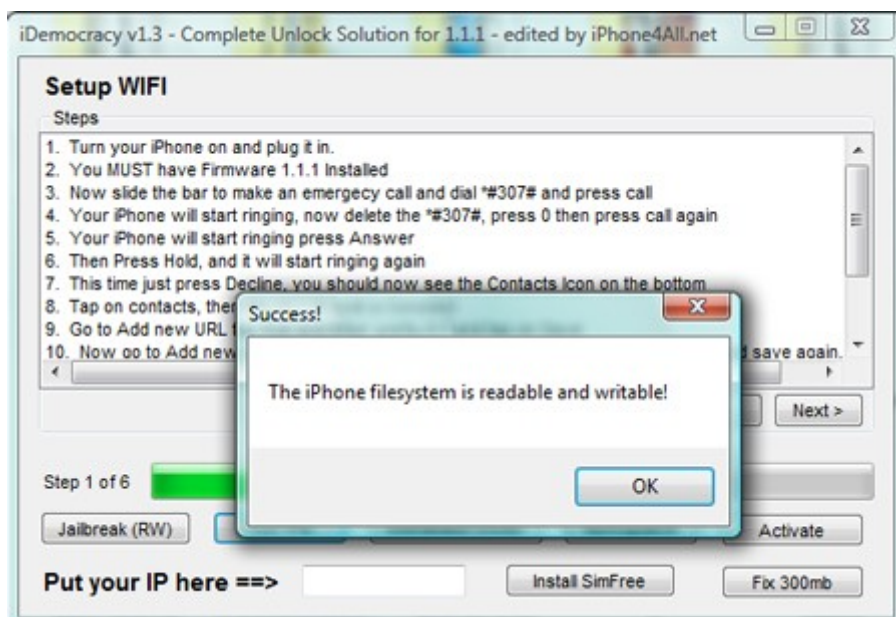

If you get any error and iDemocracy doesn't open, you need to install .NET Framework <http://download.microsoft.com/download/5/6/7/567758a3-759e-473e-bf8f-52154438565a/dotnetfx.exe> or go to our Downloads page and download the .NET Framework, install it and then try to open iDemocracy again, this time it should work fine.

Pic-14

Now you will to put your IP on the text box, then you click Jailbreak (RW), you should get a message saying “The Force RW process should have completed properly ....” click OK and then turn off your iPhone, then turn it back On.

Now click on the Test RW button, and you should receive a message saying you have read and write access to the file system (“Pic-15”)

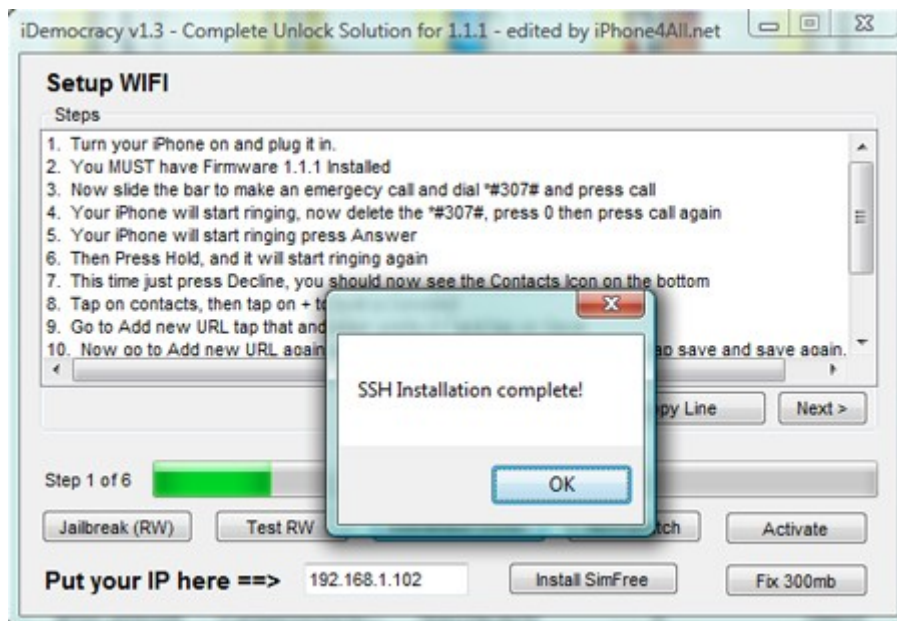

Pic-15

If your screen looks like (*"Pic-15"*), then you should have successfully completed jailbreak.

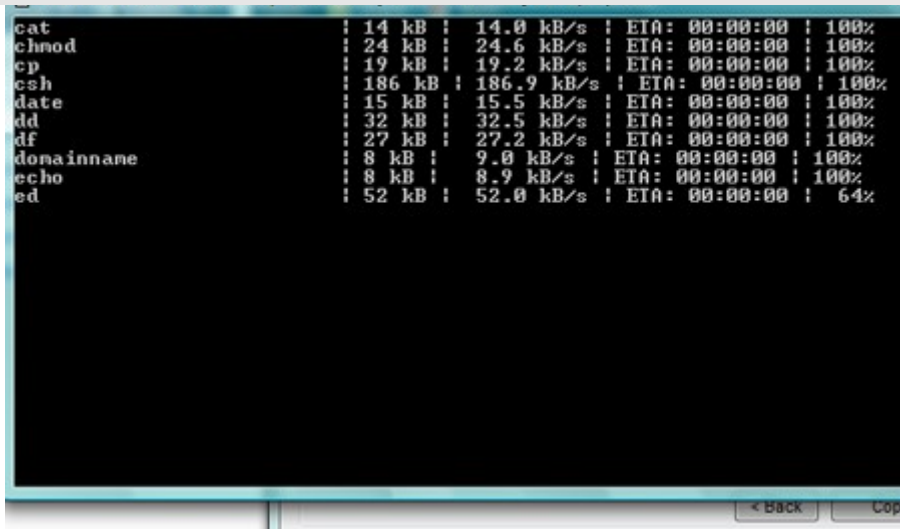

### Step 03 – Install SSH – BSB – Installer.app

Make sure your iPhone IP is on the text box, now click on the SSH/BSB/APP Button, and follow the instructions on the screen, you will need to restart your iPhone a couple times, so be patient. If everything went well you should get a message saying "SSH Installation Complete" (*"Pic-16"*), click OK and it will continue with the rest of the installation.

Pic-16

You should now see the same message like above, this time it will say AppTapp Installation complete, click OK, and it will continue; it will now open a lot of screens and closes don't press anything you will screens like this (*"Pic-17"*)

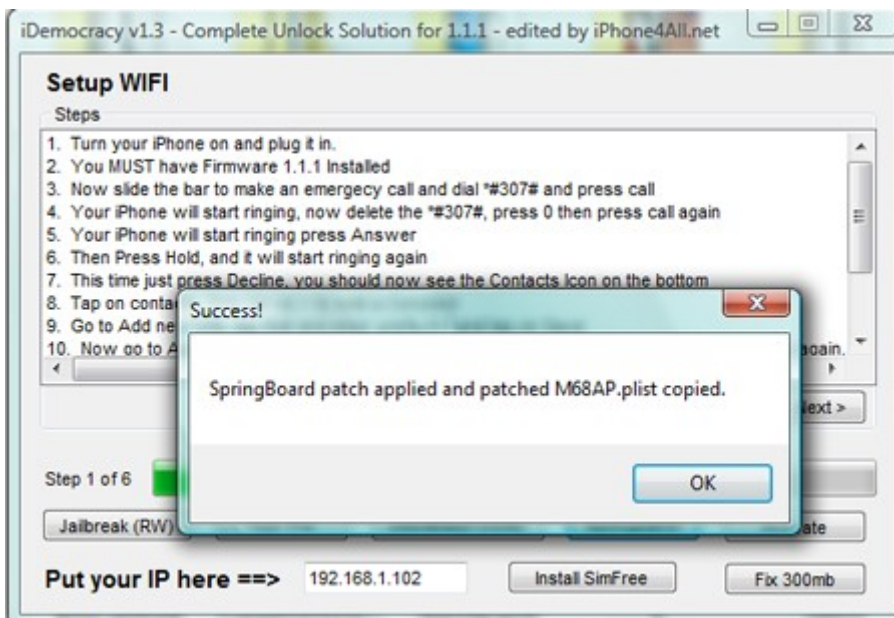

Pic-17

In the end it will give you a message BSB Installation complete, click OK and we are done installing.

### Step 04 – Patch the SpringBoard

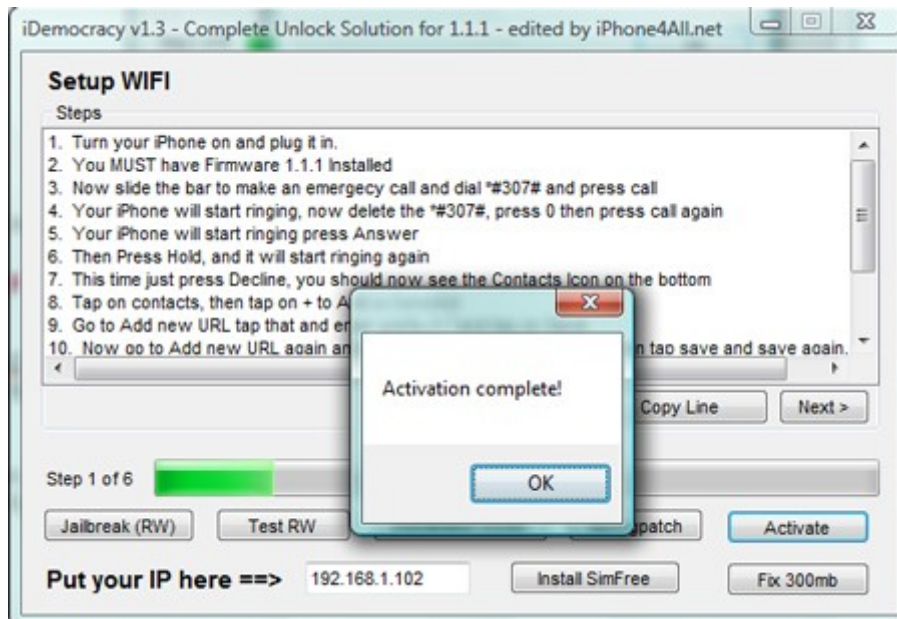

On your iDemocracy application click on Springpatch Button, and you should receive a confirmation message that springpatch is complete (*"Pic-18"*), and you're done

Pic-18

### Step 05 – Activation

On iDemocracy click on the Activate Button, follow the instructions on the screen, after it completes it should give you a message like (*"Pic-19"*), now restart your iPhone.

Pic-19

### Step 06 – Install SimFree Application

If everything went smooth, you should now see the iPhone spring board (*"Pic-20"*), now let's go back to iDemocracy and then you will click on Install SimFree, it will install in the end you will get SimFree.app installation complete, click OK, and you should now see the SimFree application on your spring board (*"Pic-21"*)

Pic-20

Pic-21

### Step 07 – Unlock

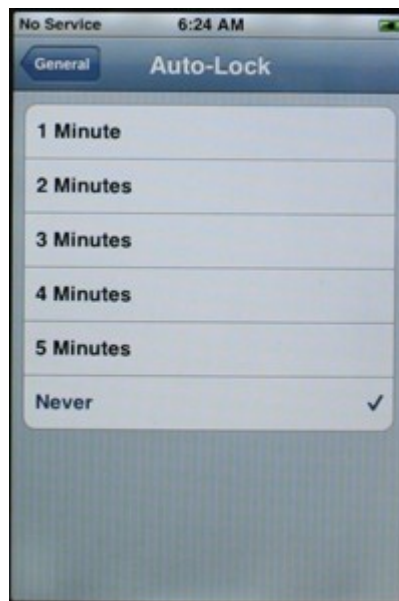

### Minimal Requirements:

1. You have to make sure you have already paid for you license, you have submitted your IMEI Number with your payment, and you have confirmation from US that your IMEI is registered with the iPhoneSimFree Server.
2. Make sure you are connected to a WIFI connection; YOU MUST be connected to a WIFI connection in order for the software to run.

Assuming you have a WIFI connection let's start (It's about time huh?).

***If you have previously unlocked your iphone with any other software, please remove the sim card, leave it WITHOUT sim card, restart the iPhone and then start the process to unlock.***

Let's make sure your Auto-Lock is set to never. On iPhone tap on Settings, then General, then Auto-Lock then make sure the check mark is set to never, if not tap on never to set the check mark, it should look like this ("Pic-22").

Pic-22

Now press the Home Button to return to the springboard, and tap on the SimFree Icon (Red Apple) and;

Tap OK ("Pic-23")

Pic-23

In "Disclaimer" screen tap OK ("Pic-24")

Pic-24

Now tap on the Red Apple ("Pic-25")

Pic-25

Now it will perform the unlock

- Stopping CommCenter...
- Checking unlock status...
- Checking for valid license...
- Preparing for unlock...
- Creating fingerprint...
- Communicating with server...
- Unlocking...
- Cleanup...
- Checking unlock status...
- Starting CommCenter...

UNLOCK SUCCESSFUL ("Pic-26")

Now tap OK, it will ask if you want to remove SimFree ("Pic-27")

Pic-26

Pic-27

DONE !! If you don't have your SIM card in the tray yet, insert it and make a call to confirm.

Your iTunes is probably not showing your iPhone, or it shows that you only have 300mb disk space, go to iDemocracy and click on the Fix 300mb Button, then restart your iPhone and everything should be Perfect.

ENJOY YOUR IPHONE !!!
