

# The iPhone4All unlock guide

- English -

- Windows Version -

 **Warning:**

If your iPhone is Brand New go to “**Step-01**”

If you have previously jailbroken and activated your iPhone then go to “**Step-05**”

If you have previously unlocked your software with any other unlocking software, you will need to upgrade to 1.1.1 with iTunes, then proceed to “**Step-02**”

**iTunes 7.4.x Version is required**

**Index**

- Step-01 – How to determine which version on firmware do you have;
- Step-02 – Downgrade Firmware back to 1.0.2;
- Step-03 – Jailbreak Firmware 1.0.2 and install Installer Application
- Step-04 – Activating iPhone;
- Step-05 – Install SimFree Application;
- Step-06 – Performing the Unlock;

## Step 01 – How to determine which version on firmware do you have

If you phone is not activated all you see this is “Pic-01”.

Slide the bar to make an emergency call; Now dial \*3001#12345#\*; (“Pic-02”) and press call.

Pic-01

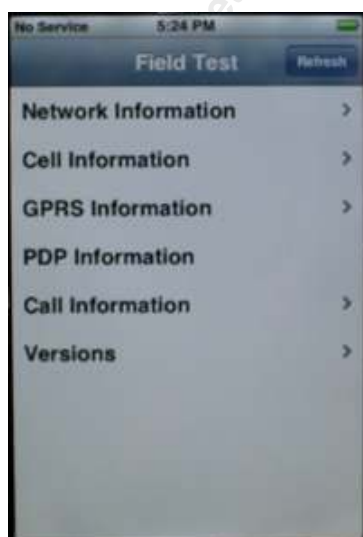

Pic-02

Then tap on version “Pic-03”.

If you see Modem Firmware: 04.01.13\_G, then you have 1.1.1 (“Pic-03”) – Go to “Step-02”.

If you see Modem Firmware: 03.14.08\_G, then you have 1.0.2 (“Pic-04”) – Go to “Step-03”.

Pic-03

Pic-04

If your iPhone is already activated then go tap on Settings, then General, then About, scroll down Modem Firmware.

If you see Modem Firmware: 04.01.13\_G, then you have 1.1.1 (Pic-03) – Go to “**Step-02**”.

If you see Modem Firmware: 03.14.08\_G, then you have 1.0.2 (Pic-04) – Go to “**Step-03**”.

### **Step 02 – Downgrade Firmware back to 1.0.2**

1. You will first need to DOWNLOAD the 1.0.2 restore file from apple, save the file to your desktop.
2. You will also need to DOWNLOAD iPhone Files.zip, save and extract the files to your desktop.

After you have downloaded the file, make sure your iPhone is on and connected to the computer, now hold the power button and the home button (“Pic-05”) at the same time for about 10 seconds, after 10 seconds release the Power Button ONLY (“Pic-06”) and keep holding the home button for another 10-15 seconds,

Pic-05

Pic-06

While still holding the Home Button open your iTunes and it will say you need to restore (“Pic-07”), click OK.

Pic-07

Now hold the SHIFT key and press restore, and select the file you downloaded ("Pic-08").

Pic-08

Now iTunes will restore the iPhone back to 1.0.2 ("Pic-09").

Pic-09

In the end it will give you an error ("Pic-10"), don't worry this is supposed to happen :) just click OK.

Pic-10

iTunes will say you need to restore again (“Pic-07”), just click OK. Now on your iPhone you will see it has a yellow triangle and it says Please Connect to iTunes (“Pic-11”).

Pic-11

Now go to the Folder iPhone\_Files on your desktop and open the file AppTappInstaller.exe click continue, now choose Firmware 1.0.2 and click install (“Pic-12”).

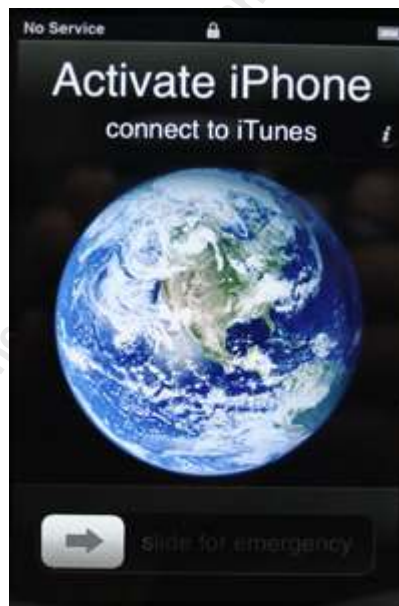

Pic-12

In the end it will say it Sending to iPhone Failed (“Pic-13”), just click OK.

Pic-13

Your phone now should be back to the activation screen ("Pic-14").

Pic-14

### Step 03 – JailBreak Firmware 1.0.2 and install Installer Application

If you skipped Step 02 then you need to DOWNLOAD iPhone\_Files.zip, save and extract the files to your desktop.

Now go to the Folder iPhone\_Files on your desktop and open the file AppTappInstaller.exe (Again if you did "**Step-02**") click CONTINUE, now choose Firmware 1.0.2 and click install ("Pic-12").

This time it should work just fine "Pic-15". Click Close so your iPhone should be in the activation screen again ("Pic-14").

```
C:\Users\Anderson\AppData\Local\Temp\AppTapp\iphonecomm.exe
* iPhoneComm v2.0
Using 009-7698-4.dmg as the Ramdisk Image.
Using kernelcache.release.s518900xrb as the Kernel Cache.
Architecture: win32
Stage 0: 0 Looking for iPhone...
Stage 1: 1 Sending preliminary files...
Stage 1: 2 Entering recovery mode...
Stage 2: 3 Sending boot files...
Stage 2: 4 Booting iPhone in recovery mode...
Stage 3: 5 Waiting for iPhone to finish booting (5 seconds)...
Stage 3: 6 FilesystemCheck 1...
Stage 3: 7 FilesystemCheck 2...
Stage 3: 8 Mounting filesystems...
Stage 3: 9 Moving files into place...
Stage 3: 10 Cleaning up...
Stage 3: 11 Unmounting filesystems...
Stage 3: 12 Rebooting iPhone...
Stage 3: 13 Waiting for pre-final iPhone reboot...
Stage 4: 14 Exiting recovery mode...
Stage 4: 15 Booting iPhone in normal mode...
Stage 5: 16 Sending final files...
Stage 5: 17 Done
```

Pic-15

### Step 04 – Activating iPhone

Now go to the Folder iPhone\_Files on your desktop and open the folder PACAY and run (CLICK HERE) activate.BAT and just press enter ("Pic-16").

```
C:\Windows\system32\cmd.exe
*****
* iPhone POINT AND CLICK ACTIVATION (with YouTube) - PACAY *
*
* by brasuco *
*
* This script will activate your iPhone via *
* patching activation with working YOUTUBE!!! *
*
* http://hackint0sh.org/forum/showthread.php?t=3658 *
*
* Thanks to NateTrue, ziel, NerveGas, Nightwatch, GeoHot, *
* and all members of the #iphone dev team. *
*Special thanx to deleonju (youtube) and Darkmen (activation)*
*****
WARNING: YOU HAVE TO JAILBREAK YOUR IPHONE FIRST. It won't work otherwise.
Dunny proof instructions can be found in: www.hacktheiphone.com
There are no guarantees on running this software.
You may even damage your iPhone with it.
Consider yourself warned!
Are you ready? (To cancel press CTRL+C. to go on press any key)
Press any key to continue . . .
```

Pic-16

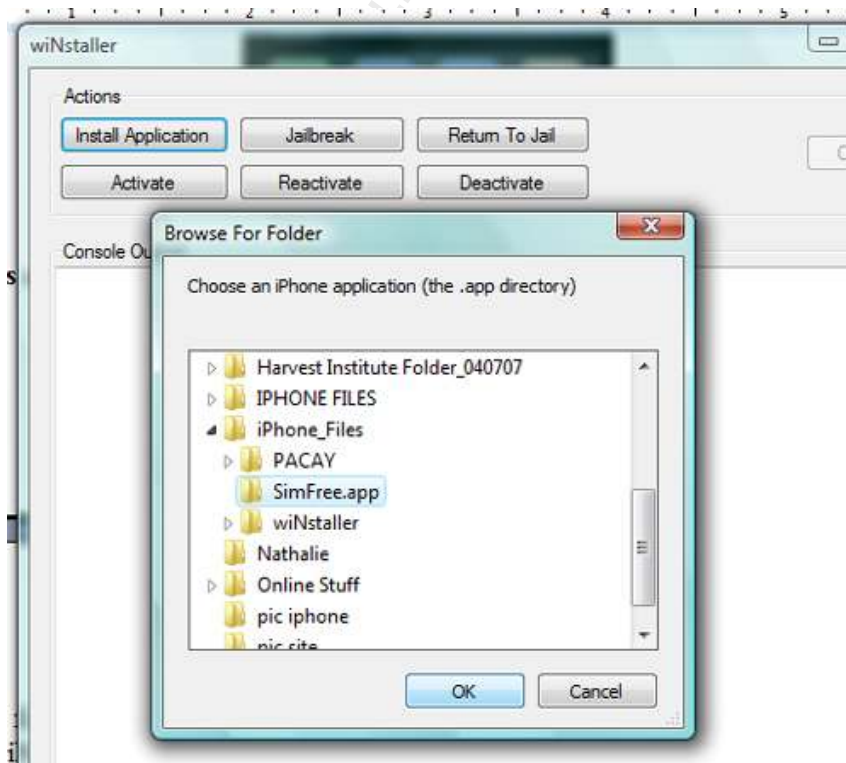

After PACAY is done you will need to restart the iPhone, after you restart, the iPhone will be activated "Pic-17".

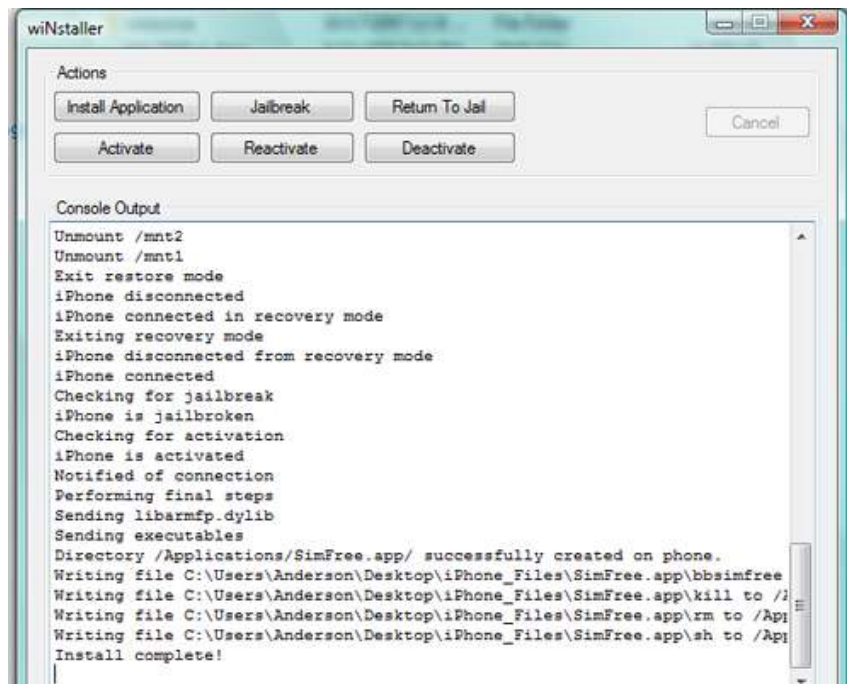

Pic-17

### Step 05 – Install SimFree Application

Go to the folder on your desktop iPhone\_Files, open the folder wiNstaller, and then open the file wiNstallerGUI.exe, now click Install Application, scroll down until you see the iPhone\_Files folder, then select the SimFree.app folder and click OK (*Pic-18*). In the end it will say install complete (*Pic-19*).

Pic-18

Pic-19

 **Warning:**

If your screen doesn't look like this, it didn't install correctly, make sure you have a SIM card in the iPhone (doesn't matter which one), and redo this step one more time. If everything looks like ("Pic-19") then on the springboard of you iPhone you should see the SimFree icon ("Pic-20").

Pic-20

## Step 06 – Performing Unblock

### Minimal Requirements:

1. You have to make sure you have already paid for you license, you have submitted your IMEI Number with your payment, and you have confirmation from US that you IMEI is registered with the iPhoneSimFree Server.
2. Make sure you are connected to a WIFI connection; YOU MUST be connected to a WIFI connection in order for the software to run.

Assuming you have a WIFI connection let's start (It's about time huh?).

If you have previously unlocked your iphone with any other software, please remove the sim card, leave it WITHOUT sim card, restart the iPhone and then start the process to unlock.

Let's make sure your Auto-Lock is set to never. On iPhone tap on Settings, then General, then Auto-Lock then make sure the check mark is set to never, if not tap on never to set the check mark, it should look like this ("Pic-21").

Pic-21

Now press the Home Button to return to the springboard, and tap on the SimFree Icon (Red Apple) and :

Tap OK ("Pic-22")

Pic-22

In "Disclaimer" screen tap OK ("Pic-23")

Pic-23

Now tap on the Red Apple ("Pic-24")

Pic-24

Now it will perform the unlock

- Stopping CommCenter...
- Checking unlock status...
- Checking for valid license...
- Preparing for unlock...
- Creating fingerprint...
- Communicating with server...
- Unlocking...
- Cleanup...
- Checking unlock status...
- Starting CommCenter...
- UNLOCK SUCCESSFUL ("Pic-25")
- Now tap OK, it will ask if you want to remove SimFree ("Pic-26")

Pic-25

Pic-26

DONE !! If you don't have your SIM card in the tray yet, insert it and make a call to confirm.

ENJOY YOUR IPHONE !!!
